

**CS 522-WS**  
**Assignment 2**  
**Ranjan Jayapal**

**Report of Submission**

I have developed the book store application in Android Studio 2.2 and have named the application **Ranjan Jayapal's Book Store**.

It contains the following:

- Main Activity
  - A List for all the cart items
  - The list can be entered into
- AddBook Activity
  - All the required fields to add a book or cancel it
- View Book Activity
  - Clicking on a book from the main list will take to this view where we can view the details of the book
- Checkout Activity
  - We can checkout from the cart or cancel the order. Checking out will remove all the books from the cart

The title of the App says **Ranjan Jayapal's Book Store**

I have run the application in an emulator and taken a video as well.

The emulator is a Nexus 5 AVD.

I have zipped the following files for submission:

- Android Studio Project inside a directory named **Ranjan Jayapal**
- Report of Submission named README\_BookStore.pdf
- Video containing the working of the application.
- All of them are zipped with my name and sent.
