

Report of Submission

I have developed my first application in Android Studio 2.2 and have named the application **Ranjan Jayapal's Chat App**. It contains the following:

- Chat Client
 - An EditText for user's message
 - Default port number
 - And the IP Address
- Chat Server
 - List View of all the messages received from the client .
 - The title of the App says **Ranjan Jayapal's Chat Server**
 - I have run the application in an emulator and taken a video as well.
 - The emulator is a Nexus 5X AVD.
 -

I have zipped the following files for submission:

- Android Studio Project inside a directory named **Ranjan Jayapal**
- Report of Submission named README_ChatApp.pdf

Note: I have submitted this later since I did not have a laptop powerful enough to run two emulators at the same time and hence I am resubmitting professor. Hope you consider please.

Thank You.
