

CS 522-WS
Assignment 1
Ranjan Jayapal

Report of Submission

I have developed my first application in Android Studio 2.2 and have named the application

Ranjan Jayapal's First App.

It contains the following:

- Main Activity
 - An EditText for user's input
 - A Button to call the Second Activity
- DisplayMessageActivity
 - A TextBox for echoing the message

The title of the App says **Ranjan Jayapal's First App**

I have run the application in an emulator and taken a video as well.

The emulator is a Nexus 5 AVD.

I have zipped the following files for submission:

- Android Studio Project inside a directory named **Ranjan Jayapal**
- Report of Submission named README.pdf
- Video containing the working of the application.

Below are the screenshots of the working application:
